ADDRESSES ON THE MOVE...

WHEN a man is wounded in action or seriously ill, he is rushed through field and base hospitals with all possible speed, to the place where most effective treatment can be given. Because of this rapid movement, his mail may not "catch up" for some time, yet, if ever he longed for a letter from home, it is at such a time.

To offset possible delays, a new "Short-Cut" mail service has been put into effect. A Priority Casualty Card is filled in and rushed by Air Mail to his friends or relatives with instructions to add the words "In Hospital" to the unit address they usually use.

Letters mailed from Canada bearing the words "In Hospital" are routed direct to the records office in the United Kingdom or the Central Mediterranean Force, as the case may be. They are given preference in transport, whether sent by Air Mail or regular mail. Thus they will reach the addressee faster than ever before.

It is inevitable that in tracing men who have been moved, or wounded, some delays occur. But you can rest assured everything that can mean speedier deliveries of letters to your men is being well and thoroughly done—and will be done.

When you get a Priority Casualty Card be sure the words "In Hospital" are added to the regular unit address when writing overseas.

BREWING INDUSTRY OF ALBERTA

To the patrons of Chinook Theatre

I am indeed sorry that I have failed to come up with the show again this week. About three ago I had a new part inserted in the machine operating last broke off and so could not operate any longer. I phoned Calgary and he told me that he could replace this part and have the machine operating this week end so that I expect I will surely be able to show again at Chinook next Tuesday. Watch for regular ad on next week's show.

WEEKLY NEWS FROM THE U. F. A. Co-op

Dear Patron:

In spite of congested railroads, labor scarcity and all the other complications inevitable in a country at war, we have managed to lay in a real good supply of FENCE POSTS. We believe these offer you a wide choice in as good a shipments of posts as you have seen for a long time at reasonable prices. We pay the government subsidy of 10 per cent discount on all purchases of \$10.00 and up. Drop in and have a look.

Cedars, good size free from rot 7 foot	25c	
- a few heavy	7 foot	29c
Round corner post large	50c	
Extra heavy hand picked	65c	
Kails, these are all sizes, as they come	35c	
Extra heavy hand picked	59c	
Tamarac, for longer service, large	25c	
" " " small	20c	
Corner Posts	50c	

The car of willow posts we had is all sold, but we are trying to make arrangements to have another one in, this may take some time and may not be here for another month at the earliest.

Post-War Housing

PRIME MINISTER CHURCHILL, in a recent radio address, dwelt at some length on plans for post-war housing which are now being drawn up in Britain. The need for these plans is urgent, for it is estimated that in the first ten years after the war, 4,000,000 permanent new homes will be required there. Considerable study has been given to the subject and a number of reports have been submitted to the government. Emphasis has been placed on the necessity of giving careful consideration to problems relating to community development. It has also been recommended that a "master plan" be made for the proper use of Britain's land resources. Mr. Churchill has defined the most urgent needs of the country after the war as food, work and homes, putting housing among the most necessary post-war requirements. Bomb damage has destroyed many residential areas in the United Kingdom, and has greatly aggravated a shortage of living accommodation which had been evident even in times of peace.

Similar Need Is Felt Here The housing situation in Britain, and the manner in which it is being handled, is of much interest to Canadians, for we have a similar problem which is now receiving considerable attention. While the housing requirements here do not reach the proportion reported in Britain, it is believed that from 600,000 to 1,000,000 new dwellings will be needed in the Dominion during the first ten years after the war. These will provide for the relief of overcrowded and slum areas and for the demand for new homes in that interval. Housing authorities report that at the present time we have a shortage of about 300,000 dwellings, and all requirements were to be adequately met. A sub-committee of the Canadian Advisory Committee on Reconstruction has been studying problems of Housing and Community Planning, and their work has produced many interesting facts relating to this subject.

Special Study Of Farm Homes

The importance of town and community planning has been emphasized here, as it was in Britain. There have also been proposals in regard to simplifying the financing of new homes, or of repairs to dwellings now in use, both in urban and rural localities. Attention has been directed towards the housing situation in farming communities and it is estimated that 150,000 farm dwellings will require repairs and improvements, while there will be need for about 125,000 new farm homes, in the ten-year period following the war. For some time it has been felt that rural housing is a highly specialized study, and that efforts should be made to plan farm homes adapted to the needs of rural life. It is suggested that architects familiar with farm conditions departments of agriculture, and farm men and women should work on such plans for post-war improvements. These are only a few of the many aspects of Canada's housing problem, but they show the need for careful study and planning for the future.

Lucky Emblem

Lost Over Enemy Territory, But Germans Brought It Back Again

Harry Asquith, a Yorkshire blacksmith, made a silver-plated horseshoe for a Royal Air Force bomber crew some time ago.

The bomber was shot down over Germany, the horseshoe was salvaged from the wreckage and the Germans mounted it in one of their bombers.

The German bomber was shot down over Southern England, and Asquith now has the horseshoe back again.

ONE GOOD REASON

Many people are grumbling at the difficulty of rationing a butter under-prepared and one reason for the shortage is the fact that the Canadian Red Cross Society is shipping 100,000 pounds a week to prisoners of war. That surely should reconcile us to the need of spreading our butter just a little thinner on bread for the duration.

New Canadians

Young Czech Boy Wins First Place In Speaking Competition

His name is Polate—Alex Polak, and he's 12. The other day this Czech lad who has been in Canada only four years, won first place in the elimination contest in public speaking for the Counties of Brant, North Norfolk, Lincoln, Wentworth, Halton and Welland in Old Ontario.

Here is another example of many that drives home to us the possibilities that lie in these New Canadians whom we have too often remained aloof from in our own complacency. The success of this bright young Czech lad, who appreciates his new home in Canada, can be matched right in our own city, for again and again boys and girls born of parents from Continental Europe have emerged more than conquerors in scholastic and speech competitions. Lethbridge Herald.

Price Control And Rationing Information

Q—I would like a correct list of the contents of the new ration book number four.

A—One sheet of green tea or coffee coupons; Second—one sheet of yellow preserves coupons; Fourth—two sheets of orchid colored butter coupons; Fifth—four sheets of buttermilk coupons; Sixth—one sheet of "F" coupons; Sixth—one sheet of "K" coupons. If your ration books have any of the above-listed sheets missing, or have too many, take the faulty books to your nearest Local Ration Board for correction.

Q—Will you please tell us whether or not the price of cold wave permanent is controlled?

A—The prices of cold wave permanent are controlled. Here is the official ruling on this matter. Operators may not charge more for a coat than they did before the fall of 1941. This is the official War-time Prices and Trade Board ruling.

Q—My husband gave me a cloth coat trimmed with Persian lamb for my birthday last week. He tells me he paid \$50 dollars for it, but since then I've been able to find a little window shopping, and I find that the same coat is being sold in other stores for \$75 dollars. Isn't there a ceiling on coats?

A—Yes, there is on cloth coats, but not with any fine print. The reason is because there is a ceiling on fur. You may have noticed the high prices of fur coats this year compared with last year.

Q—Can a tenant be asked to vacate when he's behind in his rent?

A—Yes. When a tenant is more than fifteen days behind in his rent, he may be required to vacate under provincial law.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book (the book in which you keep track of your ceiling prices) mentioning the name and address to the nearest wartime prices and trade board office in your province.

Skin Eruptions

Here is a clean, stainless, penetrating antiseptic oil that brings speedy relief from the itching and discomfort.

It promotes rapid and healthy healing and ample pleasure is also relieved.

skin afflictions the Itching of Eczema is quickly relieved. It relieves the Itching of Salt Rheum, Itching Tongue and Feet and other inflammatory skin disorders.

It is a pure oil and is made from Cold Oil in the original bottle at any good druggist.

Satisfaction guaranteed or money back.

RHOESIA COPPER

From Northern Rhodesia comes copper, used for wire in driving bands for shells and (as brass) in cartridge cases. It is the largest producer of copper in the British Empire. Some of the labour is supplied by African women volunteers and production goes on for 24 hours a day.

Price Control

What Women Have To Say About Keeping Down Inflation

(By Edna Jaques)

On the farm, in the city home and all the way to Parliament Hill in Ottawa, women have only one opinion about price control. Remembering what the last war did to the household budget, they are thankful for the price ceiling. And they know it is their responsibility to check prices of everything they buy, and keep food at a level where they can be assured of enough "to keep the kids growing," as one of them put it—and set a good table.

Here are some of the things women have said about price control: "Price control and price ceilings have saved the country. There have been a few mistakes, naturally, but on the whole, price control has been our salvation"—Mrs. Cameron Dow, President of the Federated Women's Institutes of Canada.

"But for price control they would be desperate. Hundreds of my people live on fixed incomes, old age pensions, pensions for the blind, etc., and if prices were allowed to rise, the plight of people like these (and they are legion) would become desperate in the extreme"—Thelma Williams, executive secretary of the Ottawa Welfare Bureau.

"Every organized group leader in Canada should bring before her organization the vital problem of price control. The fight against inflation and uncontrolled prices must be waged in every kitchen in the country"—Mrs. John Detwiler, of London, Ont., national educational secretary I.O.D.E.

"Housewives who remember the years of the last war will undoubtedly agree that the present system of price control has been of tremendous advantage. I recall distinctly the days of the last war when butter sold at 75¢ a pound and potatoes in the neighborhood of \$7.00 a bag"—Senator Carline R. Wilson.

"Price control in Canada has certainly been a boon to the country and saved the inflationary prices with which the United States has had to cope"—Mrs. George Black, of the Yukon.

And the little woman at a church meeting summed it all up without fuss or feathers when she said: "We are not asked to push on and storm a beachhead, or build a bridge under enemy fire, we are only asked to hold the line against inflation—our battle ground is right smack in our own kitchens, that's our job, ladies!"

Plastic Paint

Another Important Discovery Which Has Resulted From Research

When is paint not paint, that is the question? And the answer is when it's plastic! Such a product has just been perfected for painting ship's bottoms. The result is a cleaner hull; and a cleaner hull means less drain on the engines, more speed and less time in dry dock, not to mention a saving in fuel.

Plastic paint is one of those wartime discoveries which resulted from pre-war research.

GEMS OF THOUGHT

RENEWAL

Fallow and change we need, nor constant toll.

Not always the same crop on the same soil—W. W. Story.

Today is not yesterday; we ourselves change; how can our Works and Thoughts, if they are always to be the fittest, continue always to be the same? Carlyle.

To re-create cheerfulness, hope in God or change the object of attention to one more elevated and worthy of thought—C. Simmons.

Lord, what a change within us one short hour

Spent in Thy presence will avail to make!

What heavy burdens from our bosoms take!

What parched grounds refresh as with a shower!

—Richard C. Trench.

Inspired thought relinquishes a material sensual, and mortal theory of the universe, and adopts the spiritual and immortal.—Mary Baker Eddy.

Be not conformed to this world; but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God.—Romans 12:2.

IN MERCANTILE MARINE

Over 40,000 Indian seamen are engaged in the British Mercantile Marine, serving in all parts of the world. They account for about a quarter of the men who man the Merchant Navy.

Danger From Moths

How To Protect Clothes During Summer Storage

The problem of protecting winter clothing from moths during summer storage entails more care than when summer clothing is put away for the winter, because in warm weather insects are more numerous. At the same time, insects may be quite active in winter in heated buildings.

There are two main points to be observed in the protection of household articles subject to damage by moths.

The articles to be stored should be thoroughly clean, and the receptacle in which they are placed should not have the slightest hole or crack through which a moth might enter. If there is such a means of entrance, the trunk, box, drawer, bag or whatever receptacle is used, is not moth-proof.

Washable articles before being stored away should be washed. Clothing, blankets, and such-like articles, should be thoroughly brushed. Preferably, where possible, they should be sent to the dry cleaners before being placed in storage. To reduce the chance of infestation, moth balls or other repellent may be used. In trunks or boxes they may be scattered about, but a much tidier way is to obtain pin-up medallion repellents which may be bought at most stores. They may be pinned up in cupboards, and on the inside of the lids of trunks and boxes. The fumes from these chemicals are deadly to insects, and being heavier than air they penetrate to the bottom of the receptacle. Particularly with bags, it is easy to sweep the repellent near the top of the bag, above the hanger, and away from the clothes. Where naphthalene flakes can be obtained, an effective method is to enclose an ounce or two in a home-made cheese cloth bag and suspend it from the top. Moth balls may be used in the same way.

Plane felting may be guarded by suspending the repellent in a cheese cloth bag inside the piano, and keeping the piano closed when not in use. Further information about the protection of articles in the home will be found in Publication 637 (Circular 137) "Control of Some Common Species of Household Insects", obtainable free by writing to Dominion Department of Agriculture, Ottawa, Ontario.

A WORLD RECORD

The Mosquito is the only first-line aircraft which had not been designed before the war started. Its production time represents a world record from drawing board to operation: it was in action against the enemy only 12 months after it had been designed.

The term "skyscraper" was originally applied to a skyscraper of triangular form.

Equal To Job

Two Women Welders Astonished

Foreman Of Construction Firm

Two girls (who modestly wish to be nameless) started the workers

and officials of a local construction firm by their unorthodox knowledge. It happened this way:

The two nameless girls learned arc welding at Toronto Shipyards, and so enthusiastic were they in their work that they learned many things about shipbuilding from mechanics and fellow workers. When a big construction firm was confronted with the problem of bending a bow shell plate and had no mechanic to do the job, an S.O.S. went out to the Toronto Shipyards. . . . There was not, however, a plate shop man who could be spared, but one of the platers said he "knew a couple of hands that might take an hour off and show on." He named the girls, who had picked up considerable knowledge of plate shop work. They were despatched forthwith to the big construction firm. They were met by a startled foreman. They did bend the required plates themselves, and it was an A1 job—Toronto Telegram.

Stop Dosing Constipation

There Is A Better Way To Correct A Common Cause

Yes, you can free yourself from slavery to "dosing"—with its gripping unpleasantness, its lack of lasting relief if your trouble is due to insufficient "bulk" in your diet! Do as thousands of others do—get rid of constipation by supplying the missing "bulk-producing" material needed for easy, natural elimination. Try eating a daily serving of ALL-BRAN® muesli. Drink plenty of water. Get ALL-BRAN® at your grocer's. 2 convenient sizes. Made by Kellogg's in London, Canada.

Peace-time Plans

Furniture Factories Expect To Be Kept Busy After The War

The furniture industry, believing itself one of the industries which can most readily be changed to civilian production, is conducting a nationwide survey to assess volume of workers it can absorb in the immediate post-war period. Heavy buying of furniture at the end of the war is expected to cause a sharp increase in the number of men now employed in factories and retail outlets.

The burning of coal was prohibited in London in 1930 because of the smoke it produced.

OUR COMPLETE SHORT STORY—

Love And War

By SEYMOUR RICHIN

McClure Newspapers Syndicate

George was almost on his knees pleading with Eddie. There was a wild look in George's blue eyes. The sun was shining brighter than ever before. The sky was never bluer—he had never felt better. All in all, a very satisfactory awakening. Eddie hummed as he washed, thinking of Judy. He sang as he dressed, thinking of Judy. He whistled as he went out to breakfast, still thinking of Judy.

Eddie undressed and went to bed. Eight doors down the hallway George was struggling frantically into a tuxedo. On his dresser he had two dollars and change—just enough for a movie after the dance.

It seemed to Eddie as he got up the next morning that the sun was shining brighter than ever before. The sky was never bluer—he had never felt better. All in all, a very satisfactory awakening. Eddie hummed as he washed, thinking of Judy. He sang as he dressed, thinking of Judy. He whistled as he went out to breakfast, still thinking of Judy.

George's door was at the head of the stairs. Eddie knocked in passing and was astonished to hear a jovial "Come in!" Eddie stopped whistling. He pushed the door open and entered. George was sitting on the end of his bed, pulling on his socks. "Good morning, Eddie," he greeted. "How's the boy?"

Eddie stared wonderingly at the smiling George. "Did you have a nice time last night?" he asked after taking a deep breath.

"Yes," George replied, beaming happily. "And you can be the first to congratulate me, Eddie. Judy and I are engaged."

Eddie gaped.

"We didn't go to the dance last night," George continued. "Judy's uncle was taken sick and she had to stay at his store. So the dance was off. And, Eddie, it was all so funny. When I went in Judy kissed me right away. It was much better than any dance." George rubbed his lips.

"Where's my tux?" Eddie asked weakly.

"At Judy's uncle's," George replied. "The Park Central Vat Shop, you know, where you rent it. Judy said she got your phone call. And that's what I'm wondering about. Why'd you want to call the Park Central, Eddie?"

wins and Judy has given you the decision."

George gaped at Eddie, flabbergasted. "Then the war's over?" Eddie nodded. "Yes. Over. Truce. Armistice. Peace and what have you. I retire from the field of battle. You win and I lose."

"Then you'll lend me your tuxedo?"

"Of course, George. Of course. I'd lend you my ears if you wanted them, George. But I shall continue to like Judy. Privately, though, to be sure."

"Eddie," George said solemnly, slapping him on the back, "you're a real pal. A staunch, stalwart pal. A man that would give his heart's blood for a friend."

"Save it, George. Save it for my birthday. My tuxedo's in that closet. Put it gently. It cost me good American cash."

"Thanks, Eddie," George yelled, as he dove for the closet. "Thanks!" he shouted, running for the door. "I'll never forget this."

"No," Eddie murmured as George bolted out of the room, "you never will. I'm going to see that myself." A few minutes later Eddie reached for the phone. He dialed swiftly, a contented smile on his face.

"Hello," he purred smoothly. "This is Eddie." Eddie said, "This is Eddie Lewis. I rented a tuxedo from you two weeks ago. Yeah, of course I know it's not paid for! Don't get excited, miss, you'll deafen me. There's nothing worse than a woman who shrieks. You'll get your money. A friend of mine is saving the tux tonight at the school dance. Get this. His name is George Wintrop. He's agreed to pay for it. Send someone over to collect." Eddie put down the phone, his wide smirk threatening to reach his ears. "George," he muttered, "you're so stupid it's a crime to beat you out!"

Eddie undressed and went to bed. Eight doors down the hallway George was struggling frantically into a tuxedo. On his dresser he had two dollars and change—just enough for a movie after the dance.

It seemed to Eddie as he got up the next morning that the sun was shining brighter than ever before. The sky was never bluer—he had never felt better. All in all, a very satisfactory awakening. Eddie hummed as he washed, thinking of Judy. He sang as he dressed, thinking of Judy. He whistled as he went out to breakfast, still thinking of Judy.

George's door was at the head of the stairs. Eddie knocked in passing and was astonished to hear a jovial "Come in!" Eddie stopped whistling. He pushed the door open and entered. George was sitting on the end of his bed, pulling on his socks. "Good morning, Eddie," he greeted. "How's the boy?"

Eddie stared wonderingly at the smiling George. "Did you have a nice time last night?" he asked after taking a deep breath.

"Yes," George replied, beaming happily. "And you can be the first to congratulate me, Eddie. Judy and I are engaged."

Eddie gaped.

"We didn't go to the dance last night," George continued. "Judy's uncle was taken sick and she had to stay at his store. So the dance was off. And, Eddie, it was all so funny. When I went in Judy kissed me right away. It was much better than any dance." George rubbed his lips.

"Where's my tux?" Eddie asked weakly.

"At Judy's uncle's," George replied. "The Park Central Vat Shop, you know, where you rent it. Judy said she got your phone call. And that's what I'm wondering about. Why'd you want to call the Park Central, Eddie?"

Super-Factory

Was Built In Scotland In The Short Period Of Four Months

Near a Scottish city, an 8,000 foot super-factory has been built in four months. Before the war an undertaking such as this one would have taken nine to twelve months. Two weeks after the site was settled, the final scheme was approved and the contract was let a month later. Consulting engineers were called in at the preliminary stages, the consultant staff working alongside the architectural staff. Bulk orders were placed with suppliers as soon as the contract was let and in order that the work should run smoothly, an organization including architects, engineers and surveyors was set up on the site from the start of the construction. Due to this idea, queries were settled promptly and efficiently and it also resulted in an excellent team spirit between the contractors and technical staff. So that work should not be stopped during rainy periods, an ingenious invention of tubular scaffold frames with tarpaulin sheets was erected—and the work went on uninterrupted.

Wooden Wonder

Mosquito Plane Flies Higher And
Faster Than Any Other Bomber

The World

They call the Mosquito plane "The Wooden Wonder" and there is nothing derogatory about it. She is the No. 1 pin-up girl of the aviation world.

Her evolution goes back to Dec. 29, 1939 when men with vision laid down plans for construction of a wooden bomber so fast she need have neither gun turrets nor gunners for protection.

May 15, 1941, saw the first flight of the fighter prototype and Sept. 19 that year the Mosquito completed her first mission, a photographic reconnaissance from 4½ miles up.

May 31, 1942, brought the bomber into action for the first time.

Nothing was said about her until Sept. 25, 1942, when Mosquitos carried out a dashing attack on Gestapo headquarters at Oslo. She made the front pages then. Winter 1942-43 saw the fighter-bomber carrying 2,000-pound bomb loads with full fighter armament of four cannon and four machine-guns. The unarmed bomber version carried 3,000 pounds of bombs.

Jan. 30, 1943, Mosquitos went to Berlin and spoiled Nazi party birthday celebrations. In March that year the Mosquito appeared as a day fighter, ranging deep into France and covering the Bay of Biscay.

The night of Feb. 23-24, 1944, they boldly bombed her up. On the morning of the 24th they announced the "Mossies" had carried 4,000-pound blockbuster into Germany.

There is nothing so far to touch her because today this small town girl is flying higher and faster than any other bomber in the world—something far in excess of 400 miles an hour.

Story From Northland

Dentist Found One Patient Who Had
Used His Ingenuity

Lieut. George A. Penstock, dental surgeon, central Park Central Vat Shop, United States army, has met some odd patients during duty tours in the northland.

He found a trapper who wore two wolves' teeth, fitted into a bridge with glue, and that Elmos have a mortal fear of dentist chairs.

A grizzled trapper munched 300 miles by dog team to "see the dentist."

"He had a bridge for two front teeth, made years ago," said Lieut. Penstock. "The teeth, however, had fallen out, and the trapper had taken two wolves' teeth, fitted them, and fitted them into the bridge with glue."

They were serviceable for a time, but the glue didn't hold too well.

The American officer, whose home is at Linderhurst, Long Island, N.Y., treated many Indians and Eskimos in the north.

"Getting the Eskimos into the chair is something," he said. "Sometimes they put up stiff resistance."

STRONGLY CONSTRUCTED

Dotted the West African landscape are the hollow nests of termites—or white ants. Often their nests are 10 feet high, and are constructed of earth and wood cemented with saliva and strong enough to hold a man.

• • •

Magistrate's Clerk: "Why haven't you paid this fine?"

Man: "When I had the money to pay, my wife wanted a new hat."

Clerk: "And you gave her the money for the new hat?"

Man: "Yes, I thought you would be more lenient than she would be if I refused."

• • •

"I hear you are giving up your pastorate," said one aged and infirm minister to another. "How are your people taking it?"

"Oh, well," was the answer—"I'm resigning, and they're resigned."

Susa, near the Persian gulf, is considered to have the longest continuous existence of any city in history—from 4,000 B.C. to 650 A.D.

GARDEN NOTES

Cultivation

Killing weeds is only one function of cultivation. In the well-tilled garden, where weeds never grow much anyway, the main job is to improve the soil by maintaining moisture, letting in air and keeping weeds out. One or two thorough cultivations of regular crops, followed by cleanings after planting, and then a little stirring up lightly with a cultivator—preferably once a week until the middle of summer—and growth will come along almost regardless of dry weather.

When To Plant

Flowers and vegetables divide themselves into three general groups—hardy, semi-hardy and tender. In the seed catalogues and in the packets of the various seasonal descriptions used, and this information provides the key to planting time in any part of the Dominion.

The first group can be put in just as soon as the ground is warm, which is when it crumbles and not packs into a ball when squeezed.

Among the very hardy are spinach, lettuce, radish and peas, among others. The second group consists of the poppies, cosmos, hollyhocks, calendula, calceolus, in the flowers.

In the semi-hardy line, vegetables and flowers which will stand a light frost at all. In this line are the carrots, turnips, parsnips, beets, beans, potato and corn in the vegetable line; and zinnias, calendula, calceolus in the flowers.

Lawn

Tender plants will not stand any frost at all. In this line are the onions, cucumbers, tomatoes, peppers, beans among the vegetables and dahlias, camas, larkspur in the flowers.

Planters and flower boxes are a fine job. Combined with meat they make a little look like a lot. But cereals do more than stretch. They add flavor, interest and food value.

As food stretchers, cereals do a fine job. Combined with meat they make a little look like a lot. But cereals do more than stretch. They add flavor, interest and food value.

Sausage And Apple Patties

1½ cups whole wheat shreds

½ cup milk

½ egg, slightly beaten

½ pound raw beef

½ pound pork sausage

½ teaspoon salt

½ teaspoon pepper

2 tablespoons minced onion

2 medium apples

Cook the wheat shreds, milk, egg, salt, pepper until most of moisture is absorbed. Add meat, seasonings and onion; mix together thoroughly. Divide mixture into twelve equal portions and form into patties.

Pat rice, corn and slice apples crosswise into thirds. Put apple slice between two patties and press together. Bake in shallow pan in moderate oven (375 degrees F.) 30-35 minutes or until done. Yield: Six servings.

Veal Paprika

4 cups corn flakes

1½ pounds veal steak

1 egg

1½ teaspoon salt

1 tablespoon water

1 clove garlic

½ teaspoons fat

½ cup water

1½ cups sour cream

2 tablespoons paprika

Roll corn flakes into fine crumbs. Cut veal into pieces about 1 by 2 inches. Dip in egg, slightly beaten with salt and water. Cut garlic in pieces and cook in fat until brown. Remove garlic, add water, cover and simmer about 1 hour. Strain and add cream. Do not stir. Sprinkle with paprika, cover and cook about 15 minutes. Yield: 4 to 6 servings. Note: Sweet cream may be used in place of sour cream.

SMILE AWHILE

"There's only one way to get rid of your surplus fat. Exercise, and plenty of it!"

"Non sense. How do you account for my wife's double chin?"

"I called to make an appointment with the dentist." *

"He's out just now."

"Ah, when do you expect him to be out again?" *

She: "Why have you brought me artificial flowers?" *

He: "Well, real ones usually die while I'm waiting for you."

A lawyer, being interrupted said:

"I will speak, as I please."

"You have spoken longer than you please," was the opponent's retort.

• • •

Sheriff—"Did you catch that automobile thief?" *

Deputy—"He surely was a lucky fellow. We had chased him a mile when our 1,000 miles were up and we had to stop and change oil."

Madge: "Don't you sailors have a ship where you get your hair cut?" *

Sailor: "No, there ain't no such ships in our fleet."

Madge: "Then what are these clipper ships I've heard so much about?" *

Magistrate's Clerk: "Why haven't you paid this fine?" *

Man: "When I had the money to pay, my wife wanted a new hat."

Clerk: "And you gave her the money for the new hat?" *

Man: "Yes, I thought you would be more lenient than she would be if I refused."

• • •

"I hear you are giving up your pastorate," said one aged and infirm minister to another. "How are your people taking it?" *

"Oh, well," was the answer—"I'm resigning, and they're resigning."

• • •

Waiter (at the club)—"There is a lady outside who says that her husband promised to be home early tonight."

All (rising)—"Excuse me a moment."

Cereals Have New Role In Wartime

Breakfast Foods Are plentiful, So Smart Cooks Use Them Three Times A Day

(By Barbara E. Brooks)

Women are taking the food situation in their stride. When the grocer announces he has run out of this or that, or the bin in the supermarket is empty, they no longer get the desperate what-will-I-have-for-breakfast look. Cheerfully, they are using the foods that are plentiful—whether they ever used them before or not.

Cereals, for instance. They're still on the grocer's shelves. Of course cereals aren't new. People have been eating them for breakfast for generations. But cereals for lunch and dinner are the beaten track. Yet today women are buying crisp prepared cereals and using them in cooking with results that are little short of amazing.

As food stretchers, cereals do a fine job. Combined with meat they make a little look like a lot. But cereals do more than stretch. They add flavor, interest and food value.

Wedding Bells

JULKE—DEMAERE

A quiet wedding took place in Calgary, on April 5th, when Anne Elizabeth Julke, daughter of Mr. and Mrs. Russell Marr of Chinook became the bride of Mr. Sidney DeMaere son of Mr. Philip DeMaere of Calgary.

The bride wore a two piece blue dress, with a corsage of red talisman roses and forget-me-nots. her halo was also of talisman roses.

Mrs. Warren Lee of Excel was her bridesmaid and Mr. W. Lee acted as best man.

After the wedding a reception was held in the Brentwood room of the Empress hotel.

The couple will reside on the DeMaere farm west of town.

Bryan Targett who is attending school at Calgary is spending a week at his home.

Mrs. Davis of Calgary arrived here last Friday and will visit for a short time with her son, Edward Davis.

Mrs. E. H. Target who spent the past two months visiting with her parents at Vancouver returned last Friday.

Cooley Bros. are paying 15 cents a lb for clean rags.

A Church of England service will be held at the School on Sunday, April 30th at 7:30

DEPARTMENT OF MUNITIONS AND SUPPLY
Honourable C. D. Howe, Minister

**ASK THE VICTORY LOAN SALESMAN FOR A COPY OF THIS LETTER—
It enables you to buy Victory Bonds through your bank—on convenient deferred payments**

FILL OUT THE LETTER AND GIVE IT TO THE
VICTORY LOAN SALESMAN—it is an ORDER
ON YOUR BANK TO BUY BONDS FOR YOU

You can buy Victory Bonds with cash which you
have saved . . . and you can buy more bonds
with money as you get it, on convenient
deferred payments.

Every Victory Loan salesman has printed copies
of the deferred payment letter at the right. (You
can also get this form letter at any bank.) All
you do is write in the name of your bank and the
amount of the bonds you wish to buy and sign it.

The Manager

(DATE)

(BANK)

Dear Sir:

I enclose application form agreeing
to purchase \$ (par value) of 3% Sixth
Victory Loan Bonds to which is attached cheque
for an initial payment of \$ *

I promise to pay you the balance of
the purchase price plus accrued interest
at 3% per annum within six months from
the date of this letter.

Yours very truly,

(PURCHASER)

(ADDRESS)

*INITIAL PAYMENT SHOULD BE AT LEAST 10% OF PAR VALUE

YOU HAVE SIX MONTHS TO PAY THE BANK
FOR THE BONDS—THE INTEREST THE BONDS
EARN, PAYS THE BANK INTEREST ON THE LOAN

You make a first payment of at least 10% of the
amount of the bonds you buy and pay the
balance when it is convenient for you to do so,
within the next six months. Bonds earn 3% for
you and this income pays the interest on the
loan during this period. Be sure to buy Victory
Bonds on this plan as well as for cash.

Canada needs more money to pay her enormous
war bill. Let your country have the use of
all the money you can save.
